Raymor

IN ALL THE BEST PLACES

Raymor has a rich past, honoured not only for its historical perspective, but for the way it points to the future.

Founded in Australia in 1947, Raymor has an impressive heritage in tapware, and more recently in sanitaryware and accessories.

Raymor has been specifically crafted to complement local kitchen, bathroom and laundry styles.

Raymor pioneered the thermal barrier which prevents heat transfer to tap handles. Raymor were also the first to develop single hole mixers and successfully develop the present day plastic 'jumper' valves, which control the flow of water.

Raymor stands for simple, classical design that provides excellent function, fine engineering and great value for money.

COUNTERTOP BASINS

Raymor countertop basins are ideal for those who seek a modern look. The basins are available in a variety of shapes and sizes and have been designed to suit every bathroom setting. They come with either a single tap hole which allows for the addition of a mixer tap, or no tap hole for combination with hob or wall mounted tapware – this complements the clean, contemporary lines of the basin range.

PEDESTAL BASINS

Raymor pedestal basins combine classic rounded edges of the wall basins with an equally stylish china shroud or pedestal. Where space is limited, these basins provide the best of both worlds. The smart and functional basins are large enough to cater for any sized room, but minimize the impact on space by being wall mounted. The clean look is then finished off with a china shroud or pedestal, which covers the plumbing without hindering the space around it.
